

# Business of the Month

## Save money and the environment

TO the majority of people, heating and hot water are basic everyday comforts.

But there is also a cost, to both our pocket and the environment.

The good news is that replacing an old boiler with a new high efficiency condensing boiler from Cureton Gas Services could give you immediate savings of around 30% on your heating bills as well as a dramatic reduction in carbon emissions.

Furthermore, because the initial cost of installing a replacement boiler can off-putting, Cureton Gas Services is now offering an interest-free, install now, pay-in-

June 2008 scheme. This means customers will be able to start saving immediately on their heating bills, savings which could be used to fund the purchase of the new boiler in 12 months' time!

Alongside this unique offer, any orders placed before the end of August this year also include five years parts and labour warranty for your new boiler - FREE!

There can never be a better time to consider fitting a new High Efficiency boiler.

Call Cureton Gas services now on 0151 630 2000 or visit the website at [www.curetongas.co.uk](http://www.curetongas.co.uk) for more details.
