

Business of the Month

Autogas - the only one in Wirral

LPGA Approved

ANDY Evans Autogas was founded in January 2002, after being in the motor trade for 15 years he decided to change avenue to LPG, when he phoned for a taxi during the last fuel crisis of 2000 and the taxi driver had an LPG car and was not affected by the fuel strike.

After further research into it he decided to train to install systems in cars, initially it was for his own cars to run on gas but demand soon took over.

He is now LPGA approved - the only one on the Wirral- and is converting, on average, one car a week.

Servicing and repairs to existing systems means that he has plenty of experience and knowledge in most equipment and can advise you on the best system to suit your car.

The average conversion takes two-three days and prices start from £800 for a single point system and from £1,300 for a multi-point injection system.

All systems carry a full 12-month/12,000 mile warranty and come with a unique LP Gas Association certificate, with assurance that the system has been fitted in accordance with Code of Practice 11.

Upgrades are available for previously converted vehicles and LPGA engineers' reports can be issued also for insurance purposes.

Andy Evans Autogas is located on Kelvin Road, Wallasey, with easy links to the four bridges, M53 and A41. So, if you are considering converting your vehicle to LPG give Andy Evans a call on (0151) 639 1555 or (07751) 631074.
